

FATEMEH GHAZAVI KHORASGANI

Quantitative Behavioral Researcher | Psychology PhD Researcher

fatemeh@uoregon.edu | +1 (510) 318-2605 | Eugene, Oregon

[LinkedIn](#) | [Google Scholar](#) | [ORCID](#) | [GitHub](#)

PROFESSIONAL PROFILE

Psychology PhD researcher specializing in quantitative behavioral science, with experience leading and collaborating on longitudinal studies, randomized experiments, survey research, psychometrics, program evaluation, and mixed-methods studies. Uses R and Python to examine how uncertainty, social contexts, and behavioral interventions shape decisions and well-being, and translates findings into digital tools, manuscripts, and stakeholder-facing recommendations.

RESEARCH EXPERTISE

Research design: Longitudinal studies; randomized experiments; survey research; mixed methods; program evaluation; preregistration; psychometrics

Quantitative methods: Linear mixed and multilevel models; between-/within-person decomposition; CFA; EFA; regression; moderation; mixed ANOVA; lagged models; reliability; sensitivity analyses

Qualitative methods: Focus groups; semi-structured interviews; thematic analysis; environmental scans

Tools: R; Python; SPSS; Jamovi; Git/GitHub; SQL; Qualtrics; custom JavaScript in Qualtrics; LaTeX

Languages: Persian (native/bilingual); English (full professional proficiency)

EDUCATION

PhD in Psychology, University of Oregon 2025–Present

Developmental psychology | Advisor: Dr. Kate Mills | GPA: 4.00/4.00

Research focus: Adolescent development, climate anxiety, social contexts, and decision-making

Master of Applied Psychological Science, Memorial University of Newfoundland 2023–2025

Applied and social psychology | Advisor: Dr. Martin V. Day | GPA: 4.00/4.00

Thesis: Commitment and System Justification Among Immigrants: An Investment Model Approach

Bachelor of Science in Psychology, University of Isfahan 2018–2022

GPA: 3.99/4.00 | Ranked in the top 2% of the Psychology Department

Undergraduate thesis resulted in a first-author peer-reviewed publication on climate awareness and support for decarbonization.

RESEARCH EXPERIENCE

Graduate Research Assistant — Social Cognitive Development Lab, University of Oregon Sep 2025–Present

Eugene, Oregon | Advisor: Dr. Kate Mills

Eco-Anxiety and Adolescent Well-Being

- Developed the research questions, hypotheses, and analysis plan for a first-author, three-wave study of 154 sixth-grade students.
- Evaluated measurement quality using confirmatory factor analysis and reliability testing, then applied linear mixed models and person-mean centering in R to separate between-person differences from within-person change.
- Identified a level-specific pattern: adolescents with higher average eco-anxiety reported lower average well-being, but short-term increases in an adolescent's eco-anxiety were not accompanied by corresponding declines in well-being.
- Found that nature connection and local ecological knowledge were associated with higher well-being but did not buffer the effects of eco-anxiety. Contrary to expectations, higher-than-usual environmental agency strengthened the concurrent relationship between eco-anxiety and lower well-being.

Climate Anxiety in Adolescent Peer Contexts

- Integrated three waves of survey responses and peer nominations and derived peer-exposure variables to examine similarity in adolescents' climate-related emotions.
- Used mixed-effects and lagged models in R to compare co-fluctuation, social-selection, peer-influence, shared-context, and social-buffering explanations.

- Revised the analytic strategy when changing participation across waves made stochastic actor-oriented modeling inappropriate, preserving alignment between the research questions and the available data.
- Preliminary results showed contemporaneous co-fluctuation but no significant lagged evidence of selection or contagion.

Graduate Research Assistant — Societal Cognition Lab, Memorial University
St. John's, Canada | Supervisor: Dr. Martin V. Day

Sep 2023–Aug 2025

Immigrant Commitment and System Attitudes

- Designed and preregistered an online study of Iranian immigrants across Canada; recruited a specialized community sample and retained 127 participants after preregistered eligibility and data-quality screening.
- Adapted established psychological measures to an immigration context and evaluated their structure and reliability; exploratory factor analysis identified distinct financial and social investment dimensions.
- Conducted multiple and hierarchical regression analyses in SPSS and Jamovi; satisfaction, investments, and perceived alternatives explained 64.5% of the variance in commitment to Canada in the primary model.
- Managed the Qualtrics study, recruitment, exclusions, interpretation, and writing of the master's research report and manuscript.

Research Intern — Memorial University and Net Zero Atlantic
Newfoundland and Labrador, Canada | Supervisor: Dr. Martin V. Day

Apr–Aug 2024

Personalized Carbon Feedback and Behavior Change

- Co-designed and conducted a preregistered, randomized two-wave behavioral intervention with a final analytic sample of 752 adults and an approximately two-month follow-up.
- Co-developed the intervention using a Define–Diagnose–Design–Test process informed by behavioral theory, prior evidence, stakeholder input, and pilot testing.
- Built a custom carbon-footprint calculator in Qualtrics using JavaScript to transform survey responses into real-time personalized estimates, visual feedback, and context-sensitive recommendations.
- Collaboratively cleaned and analyzed behavioral, intention, knowledge, and perceived-change outcomes using mixed ANOVA, follow-up comparisons, effect sizes, and robustness analyses.
- Co-wrote the manuscript, contributed to research and policy reports, and presented the study in a research workshop.

APPLIED RESEARCH AND PROGRAM EVALUATION

Graduate Assistant — Career Integrated Learning, Memorial University
St. John's, Canada

May–Aug 2025

- Developed analysis plans and evaluated university interventions designed to improve students' career readiness and transferable skills.
- Integrated quantitative and qualitative evidence and translated results into stakeholder-facing reports and presentations.

Research Intern — Centre for Collaborative Health Professional Education
St. John's, Canada | Supervisor: Dr. Adam Reid

Jan–Apr 2025

- Facilitated and analyzed focus groups and conducted thematic analysis to understand learner experiences and inform health-professional education.
- Analyzed learner-feedback surveys in Qualtrics and SPSS and conducted literature reviews and environmental scans; synthesized findings into actionable reports.

Pro Bono Program Evaluator — NL SUPPORT / Quality of Care NL
Newfoundland and Labrador, Canada | Supervisor: Cathryn Button

Sep–Dec 2024

- Designed and conducted semi-structured interviews to evaluate engagement in a Patient and Public Advisory Council.
- Completed thematic analysis and delivered stakeholder-facing findings and recommendations for strengthening participation and program delivery.

TEACHING EXPERIENCE

Teaching Assistant / Graduate Employee — University of Oregon and Memorial University

Sep 2023–Present

- Supported undergraduate instruction in Social Psychology, Biological and Cognitive Development, and Introductory Psychology through discussion facilitation, grading, course preparation, and student feedback.

EARLIER RESEARCH AND PRACTICE EXPERIENCE

Educational Psychotherapist Intern — University of Isfahan

Summer 2022

Isfahan, Iran | Supervisor: Drs. Ahmad Abedi and Amir Ghamarani

- Administered educational and psychological assessments, synthesized results, and supported feedback and intervention planning under supervision.

Research Assistant — University of Isfahan

Fall 2021

Isfahan, Iran | Supervisor: Dr. Ghasem Norouzi

- Supported an accessibility-focused research project through data preparation and analysis using Python and SPSS.

HONORS AND FUNDING

DGE Endowed Scholarship , University of Oregon — \$3,200	2026–2027
Clarence and Lucille Dunbar Scholarship , University of Oregon — \$2,500	2026–2027
Lokey Graduate Science Award , University of Oregon — \$8,000	2025–2026
School of Graduate Studies Fellowship , Memorial University — \$18,000	2023–2024
Departmental Distinction , Top 2% of Psychology students, University of Isfahan	2018–2022

SELECTED GRADUATE COURSEWORK

Data Analysis I–III; Data Science Methods in Psychology; Advanced Statistics in Psychology; Research Methods and Design; Program Evaluation; Group Processes; Developmental Psychology; Social and Personality Psychology; Theory and Methods in Social Psychology

PROFESSIONAL AFFILIATIONS

Member , Canadian Evaluation Society — Newfoundland and Labrador Chapter	2024–Present
Member , Student Scientific Association, Department of Psychology, University of Isfahan	2018–2020
